UBeat: Web development project

Team 11

12th November 2017

1 Introduction

1.1 Project

The UBeat project is a web application created for the GLO-3102 class. Its main goal is to create a music platform where a user can create playlists and share them with friends.

1.2 Team

Our team is composed of 5 people :

Enora Le-Cavorzin (enlec, 111191036)

Rémi Weislinger (rewei2, 111191060)

Louis-Philippe Dubuc (lpdub7, 111118879)

Guillaume Binet (gubin1, 903195070)

Lionel Karmes (likar7, 111190966)

2 Getting started

2.1 Setup

Well, you just have to `npm install` , and `npm start` afterwards.

2.2 Content

On the home page :
— Click on "View our artist page" to reach an example artist page (id in the url).
— Click on "View our album page" to reach an example album page (id in the url).

On the artist page :
— Click on the "Listen on apple music" button to reach the artist page on Apple Music.
— Click on any album to reach a new page and see the tracklist, listen to samples, ...

On the album page :

— Click on the artist name to go back to the artist page.
— Click on the "Listen on apple music" button to reach the artist page on Apple Music.
— Click on "Add to playlist" and choose a playlist to add the entire album to it.
    — Click again on the button to cancel
— Click on a "Play" button to listen to a short music sample.
— Click on the "Plus" button and choose a playlist to add the song to it.
    — Click again on the button to cancel

On the playlists page :

— Choose a name and click on "Create a new playlist" to create one. Its name cannot be empty.
— Click on a playlist's name to display its tracks. Nothing happens if there aren't any.
    — Click on a track's "Trash" button to remove it from the playlist
    — Other track controls are identical to the ones on the album page.
— Click on the "Pencil" button to rename a playlist. Its name cannot be empty.
    — Press enter to apply
    — Press escape or click again on the button to cancel
— Click on the "Trash" button to delete a playlist
